a réussi la Spécialisation en ligne, sans crédit

Spring Framework

This course series explains high level patterns used in Microservice architectures and the motivation to move towards these architectures and away from monolithic development of applications. Students will also learn how Java interacts with databases in a modern framework, using the very popular Spring Boot Framework, with Microservices. Students wishing to develop Java based Web Applications and Restful Micro Services will be using the very popular Spring MVC and Spring Boot frameworks with minimal configuration.
